**PERMANENT WEALTH.**

Wages are paid for the creation of wealth. Wages are labor's share of the wealth it has produced, rather than a mortgage on the wealth that it will produce. Wealth depends upon construction; and in the building field not only does the individual add to his personal wealth, but he adds to the wealth of the community and nation.

The United States now has more wealth than any other two nations combined. Every house built, every road constructed, every public building erected, every improvement added to that great accumulation of permanent wealth, making the community and nation stronger and stronger.

A general campaign of building, assuming reasonable intelligence is exercised, would do more than any one thing to increase the permanent wealth of this community and the individual. While its permanent wealth is being pulled up—especially when it is in the nature of homes owned by individuals—a community may have its perplexing problems, but there is nothing serious or dangerous about its industrial status. That is the one thing that in Janesville is interesting in. To the man who comes here to make his place of residence, contented and happy. We want to him not only to his job, but to his home. That is the reason that every person who can build should do so, in order that all who take up their place of abode in this city will have a place to live that will make them want to leave it.

The permanent wealth of a community is represented in homes, buildings, private and public construction work—is the community's reserve fund. As long as the reserve fund is growing the community is a going concern and in sound condition.

We are building a number of houses in Janesville. Buildings are being planned and others are naturally being followed as soon as the details can be worked out. But the need for houses is so great and the time so short before they will be more of a necessity than they are now, not a moment should be lost in starting construction.

Many feel that by waiting the cost of material and labor will lower. Everything at this time points to it going higher. Our development should encourage those who can build to erect homes now. BUILD NOW!

**BUDGETING CHILDREN.**

Budgeting children will teach them the value of money and often make them more careful of their clothes and shoes. It will also bring out certain traits of character that nothing else will disclose, and enable parents to correct faults before they become fixed habits. Any child old enough to be entrusted with money is old enough to be given a specified amount to spend each week, and to be told the value of saving some part of it.

Of course very young children may not be allowed to choose their clothes, but training along this line may begin very early and a sense of values and suitability deeply instilled.

Three grown girls in a certain family were given the same allowance for clothes, books, amusements, entertainments of friends, etc. At the end of the first month May had spent all of her allowance and was asking for more. Jane had saved half of hers and deposited it in the bank. She had denied herself some badly needed clothing and bought a few showy articles with the amount spent. She had accepted entertainment from some friends, but was too stingy with her own money to entertain in return. Sarah produced an account book and showed that she had bought all necessary articles of clothing, enjoyed "several" well chosen entertainments, had taken four girls to luncheon, three others to tea, and had purchased two war savings stamps paying 4 percent compound interest.

These are typical, and the information gathered from the first month enabled the father and mother to show May the folly of wasteful and careless expenditure, Jane the importance of providing necessities first, and the virtue of generosity, and to commend Sarah for her unusual business ability and a sense of thrift.

Children should buy Thrift and War Savings stamps.

**JUNE EXPORTS.**

United States exports made a remarkable jump in the month of June, according to the report recently issued by the bureau of foreign and domestic commerce, department of commerce.

The June exports are put at \$918,000,000, which exceeds the previous high record, established in April of this year, by more than \$200,000,000. The exports for June of last year were valued at \$484,000,000. Total exports to the fiscal year stand at \$7,226,000,000, as compared with \$5,920,000,000 for the fiscal year 1918. This is more than three times the exports for 1914, the last normal year. Exports since the armistice was signed in November are estimated at about \$5,000,000,000.

The excess of exports over imports for the fiscal year 1919 was \$4,120,000,000 against \$3,000,000,000 the previous year and less than \$500,000 in 1914.

Imports for June were valued at \$292,000,000, a falling off from the total of \$329,000,000 recorded in May, but an increase over the previous year, \$260,000,000 for June of the previous year. Total imports for the fiscal year just closed are placed at \$3,095,000,000, as against \$2,046,000,000 for 1918.

The removal of wartime restrictions

caused a decided increase in the exports of gold, from less than \$2,000,000 each in April and May to \$88,000,000 in June. Gold exports for the fiscal year amounted to \$117,000,000, against \$101,000,000 for 1918. Exports of silver fell off from \$29,000,000 in May to \$13,000,000 in June, but increased from \$139,000,000 for the fiscal year 1918 to \$301,000,000 for 1919.

Although the United States department of agriculture in an estimate based on crop conditions July 1, predicts a crop of 2,216,000,000 pounds of domestic sugar this year, the consumers are continually being told that the prices are going higher. Why? There is no need for conservation of sugar as far as any one can ascertain. The estimated crop this year will be 147,000,000 pounds more than the average for the preceding six years. The sugar beet acreage is record breaking this year and the best sugar forecast is nearly 75,000 tons higher than the record crop of 1916. It would appear that this would be a good time for the government to take steps to bring the prices down to normal.

The Chicago street car employees who are not satisfied with an increase of wages to 65 cents an hour, but demand 85 cents, are showing a selfish attitude. It is doubtful if Chicago's temper at this time will permit its citizens to give the strikers' demand much consideration. The first day of the strike, which came with little warning, indicated that the workers were able to reach their places of employment with little difficulty. This should be discouraging to the strikers.

It begins to look as though the house committees investigating the alleged brutality practiced upon United States soldiers in France is getting right down to "brass tacks." The way is being paved for the trial of some of the higher officers who are said to have been the instigators of the cruel treatment received by prisoners. If the scheme is not worked out so good as it is, at least one congressional investigation.

Chicago with her race riots, child murder and street car strike is living a feverish existence these days.

The Gazette maintains an information bureau at Washington, D. C., under the direction of Frederic J. Hankin. Questions will be answered by mail. Those desiring information should write to the Janesville Daily Gazette Information Bureau, Washington, D. C., and enclose a stamp. The letter will be answered by our bureau.

Q. Does the government furnish tombstones for former soldiers? E. M. M.

A. Every man who was ever in the army is entitled to a tombstone free of charge when he dies. Requests for these tombstones should be war department, Washington, D. C., together with proof of the service of the deceased.

Q. Which was the greater disaster, the Chicago or the San Francisco fire? C. W.

A. The Chicago fire burned over an area of 2,100 acres, consumed 17,450 buildings, left 70,000 people homeless and caused a property loss of \$190,000,000. The San Francisco fire burned over 1,700 acres of ground, destroyed 6,000 buildings, left 265,000 people homeless, caused a property loss of \$350,000,000 and killed 432 persons and injured 1,500. So it is apparent that the San Francisco disaster was the greater of the two.

Q. Is it true that baseball is not played in the British Isles? W. M. R.

A. Baseball was practically unknown in the British Isles before the war. The American army introduced it to a degree, but it still is played to no great extent.

Q. What proportion of the men in the army during the recent war were national guardsmen? T. H. C.

A. Out of every national guard, 13 were regulars, and 7 came in through the national army.

## OFFICER WHO DESERTED HIS MEN, IN PRISON

**ISSUED MONDAY, JULY 29.**—Convicted of deserting his men, whom he had led into the fire of the enemy, Samuel H. Stone, formerly a second lieutenant in the 101st infantry, has been sent to Fort Leavenworth, Kansas, to begin a 10 year sentence. A cable message from France notified officials of Camp Devens of the finding of a court martial which convicted him in January. Testimony by members of Stone's platoon in company H, 101st regiment, showed that he had headed night patrols to the edge of No Man's land four times and when having drawn the fire of the enemy, he left the men to their own resources and withdrew when his company was going into action at Chateau Thierry. Stone was seen to the rear of a guard line supporting line halted guard, but Stone was returning for maps. His platoon suffered losses which the court martial held included needless loss of life due to Stone's desertion. Stone's home is in Boston.

## CHAPTER IX.

Isabel's uneasiness about her husband's health—sometimes reflected in her letters to George during the winter that followed—had not been alleviated when the accredited Senator returned for his next summer vacation, and she confided to him in his room, soon after his arrival, that "something" the doctor had said to her lately had made her more uneasy than ever.

"Doctor Rainey says we ought to get him away."

"Well, let's do it, then."

"He won't go."

"He's a man awfully set in his ways; that's true," said George. "I don't think there's anything much the matter with him, though. Have you seen Lucy lately? How is she?"

"She looks—pretty!" said Isabel. "I suppose she wrote you they've moved?"

"Yes; I've got her address. She said they were building."

"They did. It's all finished, and they've been in it a month. It's small, but oh, such a pretty little house!"

"Well, that's fortunate," George said. "One thing I've always felt they didn't know a great deal about is architecture."

"Don't they?" asked Isabel, surprised. "Anyhow, their house is charming. It's way out beyond the end of Amberson boulevard; it's quite near that big white house with a gray-green roof somebody built out there a year or so ago. I suppose you'll be driving out to see Lucy tomorrow."

"I thought—," George hesitated. "I thought perhaps I'd go after dinner this evening."

At this his mother laughed, not astonished. "It was only my feeble joke about 'tomorrow,' George! I was pretty sure you couldn't wait that long. Did Lucy write you about the factory?"

"No. What factory?"

"The automobile shops. This spring they've finished eight automobiles and sold them all, and they've got twelve more almost finished, and they're sold already! Eugene is so gay over it! They're very interesting to look at; behind the driver's seat there's a sort of box where four people can sit, with a step and a little door in the rear, and—"

"I know all about it," said George. "I've seen any number like that, east. You can see all you want of 'em if you stand on Fifth avenue half an hour any afternoon. I've seen half a dozen by at almost at the same time—within a few minutes, anyhow; and of course electric hansomers are a common sight there any day. I hired one myself the last time I was there."

"No. What factory?"

How fast do Mr. Morgan's machines go?"

"Much too fast! It's very exhilarating—but rather frightening; and they do make a fearful uproar. He says, though, he thinks he sees a way to get around the noisiness in time."

"I don't mind the noise," said George. "Give me a horse for mine, though, any day. I must get up a race with one of these things; Pendergast'll leave it one mile behind in a two-mile run. How's grandfather?"

"He looks well, but he complains sometimes of his heart."

George had taken off his coat. "I don't like to hint to a lady," he said, "but I do want to dress before dinner."

"Don't be long; I've got to do a lot of looking at you, dear!" She kissed him and ran away, singing.

But his Aunt Fanny was not so fond; and at the dinner table there came a spark of liveliness into her eyes when George patronizingly asked her what was the news in her own "particular line of sport."

"Well, what's the gossip? You usually hear pretty much everything that goes on around the nooks and crannies in this town, I hear. What's the last from the gossips' corner, auntie?"

Fanny dropped her eyes, but a movement of her lower lip betokened a tendency to laugh as she replied, "There hasn't been much gossip lately except the report that Lucy Morgan and Fred Kinney are engaged—and that's quite old by this time."

There was a clatter upon George's plate. "What—what do you think you're talking about?" he gasped.

Miss Fanny looked up innocently. "About the report of Lucy Morgan's engagement to Fred Kinney."

George turned dumbly to his mother and Isabel shook her head reassuringly. "People are always starting rumors," she said. "I haven't paid any attention to this one."

"But you—you've heard it?" he stammered.

"Oh, one hears all sorts of nonsense, dear. I haven't the slightest idea that it's true."

"Then you have heard it?" George turned pale.

"Eat your dinner, George," his aunt said sweetly. "Food will do you good. I didn't say I knew this rumor was true. I only said I'd heard it."

"Fanny, you're a hard-hearted creature," Isabel said gently. "You really are. Don't pay any attention to her, George. Fred Kinney's only a clerk in his uncle's hardware place; he couldn't marry for ages—even if anybody would accept him!"

George breathed tumultuously. "I don't care anything about 'ages!' What's that got to do with it?" he said, his thoughts appearing to be somewhat disconnected. "Ages, don't mean anything! I only want to know—"

"I want to know—I want—" He stopped.

"You must finish your dinner, dear," his mother urged. "Don't."

"I have finished. I've eaten all I want. I don't want any more than I wanted. I don't want—I—He rose, still incoherent. "I prefer—I want—"

please excuse me!"

He left the room, and a moment later the screens outside the open front door were heard to slam.

"Fanny! You shouldn't—"

"Isabel, don't reproach me. He did have plenty of dinner, and I only told the truth; everybody has been saying—"

"We don't actually know there isn't," Miss Fanny insisted, giggling. "We've never asked her."

"I wouldn't ask her anything so absurd!"

"George would," George's father remarked. "That's what he's gone to do."

Mr. Minner was not mistaken: that was what his son had gone to do. Lucy and her father were just rising from their dinner table when the stirred youth arrived at the front door of the new house. It was a cottage, however, rather than a house; and Lucy had taken a free hand with the architect, achieving results in white and green outside and white and blue inside to such effect of youth and daintiness, that her father complained of "too much springtime!"

The whole place, including his own bedroom, was a young damsel's boudoir, he said, so that nowhere could he smoke a cigar without feeling like a ruffian. However, he was smoking when George arrived,
